

PMS Asset Builder

No Guesswork. No Rework.

Build PMS Data 5x Faster.

Why PMS Asset Builder ?

PMS Asset Builder is an AI-augmented platform designed for maritime teams to accelerate the creation and structuring of Planned Maintenance System (PMS) data.

Whether you're setting up a PMS from scratch or migrating between systems, PMS Asset Builder simplifies the process of converting vessel technical manuals into **high-quality, export-ready** datasets **tailored** to your target PMS platform.

From unstructured manuals to clean, PMS-ready datasets – in a fraction of the time.

-  **AI-Powered Manual Parsing** – Extracts components, spares, and jobs from technical PDFs.
-  **Structured Equipment Metadata** – Generates reusable vessel-equipment libraries.
-  **Export-Ready Format** – Direct transformation to your PMS system's data templates.
-  **Multi-File Projects** – Manage multiple manuals, retry extraction, and merge results easily.
-  **Domain-Aware Intelligence** – Built with inputs from maritime professionals.
-  **Audit & Oversight** – See what's extracted, what's missed, and where intervention is needed.

Why Choose Us?

We are ex-seafarers, marine engineers, and product builders who understand the pain of PMS data setup. This product is not just tech – it's a practical response to a long-standing operational headache. We built it the way we wished it existed when we were on the other side.

With us, we equip you to deliver PMS Data for a vessel with in a week.

That's right just 7-days !

(Average ETA 1-month)

With AI and document intelligence technologies reaching maturity, the maritime industry no longer needs to tolerate slow, costly, manual PMS creation.

Ready to Transform Your PMS Data Workflow?

Let's talk about a pilot run for your next vessel.
